

Neighbors for *Preserve Yorba Linda Hills*

As neighbors and concerned residents, we are opposed to rezoning and development of designated Open Space parcels. Right now, the consideration of conversion of 41 acres (the Hoff project) adjacent to Chino Hills State Park sets a terrible precedent for other designated open space, lettered lots, and mitigation sites in Yorba Linda. Properties planned as open space by the City, identified as “permanent” open space in the City’s 2016 General Plan, or used as mitigation for development should be off the table for future development potential. We ask the City Council to keep the current zoning of all open space, lettered lots, and mitigation lands.

No development in our open space!
